Notes

Most significantly stressed: Central & Peripheral Nervous System, Hypothalamus, Sinuses

We scan 58 points to create the system performance. There are a few systems in which your pet is currently experiencing stress as you can see from the chart above. In addition to the 3 most significantly stressed points listed above, the following points of the body are also driving some of your pet's systems down: **Adrenal Glands, Circulation, Pituitary & Pineal Glands, Teeth & Jaw Drainage, Allergy Points, Stomach, Lymphatic Drainage, Fibroid & Connective Tissue, Thyroid & Thymus**

Energetic Sensitivities

Your pet was scanned against close to 1000 different possible food and environmental sensitivities. Listed below are the items that came up sensitive. It would be good to limit exposure to the items that were found, for now. With time as the body rebalances, some of these sensitivities may subside.

Environmental:

- Bleach
- Cleaning Supplies

Dairy Alternatives:

None
Fish:

Legumes:

None

Meat:

Spices:

None

Sugars:

◦ Potpourri	None	◦ Venison	None
◦ Mold	Fruit:	◦ Turkey	Vegetables:
◦ Cigarette Mix	None	◦ Lamb	None
◦ Fossil Fuels	Grains:	◦ Duck	
Additives:	None	Nuts:	
None		None	
Ingredients:		Shellfish:	
None		None	
Dairy:			
None			

Energetic Nutritional Imbalances

Your pet was scanned for enzyme, fatty acid, vitamin, mineral, and amino acid imbalances. Below are a list if those nutrients that were found.

Vitamin Imbalances:

- Vitamin K
sources include asparagus, blackstrap molasses, broccoli, Brussels sprouts, cabbage, cauliflower, dark green leafy vegetables, egg yolks, liver, oats, rye, safflower oil
- Vitamin D
sources include fish oil, eggs, sunshine
- Choline
sources include egg yolks, legumes, meat, milk, whole-grains

Enzymes:

- Protease
dietary sources include raw fruits and vegetables, sprouted seeds, raw nuts, whole grains, and legumes
- Pepsin
this enzyme is produced in the stomach lining
- Bromelain
food sources include pineapple

Mineral Imbalances:

- Selenium
sources include meats, whole grains, brazil nuts, brewer's yeast, broccoli, brown rice, chicken, dairy products, dulse, kelp, liver, molasses, salmon, seafood, tuna, vegetables, wheat germ, cayenne, chamomile, fennel seed, parsley, peppermint
- Molybdenum
sources include beans, grains, legumes, peas, dark green leafy vegetables.
- Copper
sources include almonds, barley, beans, beets, blackstrap molasses, broccoli, lentils, liver, mushrooms, nuts, oats, oranges, pecans, radishes, salmon, seafood, green leafy vegetables

Fatty Acids:

- DHA
sources include salmon, sardines, mackerel, herring, tuna, seaweed
- GLA
sources include flax, olive, and hemp oil
- Alpha-linolenic acid
sources include flax seed, walnuts, pecans, yogurt

Amino Acids:

- GABA
sources include whole grains, brown rice, oats
- Histamine
sources include anchovies, avocados, eggplant, mushrooms, yogurt, spinach, aged cheeses, and tomatoes
- Threonine
sources include beans, lentils, eggs, fish, poultry, meat, dairy, nuts, and seeds

Energetic Toxins

Your pet was scanned against resonating heavy metals, bacteria, viruses, molds, parasites, and chemicals. Below are a list of those that were found, energetic in nature, which means your pet may just be carrying the energy of the toxin and should be cleared through the protocol. If you would like to discuss this in more detail please email us at info@petmedella.com (/contactus) or call 612-812-9121.

Bacteria:

None

Parasites:

- Parasites Resonate

Molds/Fungus/Mycotoxins:

- Mycotoxins Resonate
- MoldsFungi Resonates

Viruses:

- Viruses Resonate

Chemicals:

None

Heavy Metals:

None

Energetic Hormonal Imbalances

Your pet was scanned to find resonating hormonal imbalances and the hormones detected are listed below. These hormones will directly or indirectly be addressed through the protocol.

Hormones

- T4
Thyroxine is one of the principal hormones secreted by the thyroid gland that increases the use of all food types for energy production and increases the rate of protein synthesis in most tissues.
- Growth Hormone
A hormone secreted by the anterior pituitary that regulates the cell division and protein synthesis necessary for normal growth. The aging process usually includes loss of lean body mass, thinning of the skin, and increase in adipose tissue.

Balancing Items

[Our Store \(/shop\)](#)

After analyzing stress levels, imbalances, and toxins, a custom regimen has been developed. This regimen has been tested against the hair and saliva samples you provided to ensure the most balancing program for your pet. It is important to understand that it may take a few months of following before you see the results you are looking for because this type of work is sustained health versus a quick fix. It is suggested you get your pet scanned every one to two months to see the biggest benefits.

Flower Essences

- Ultimate Fields (<http://petmedella.com/product/ultimatefields/>) - \$26.50
This Flower Essence Traditionally Supports: Emotional Issues, Energy Balancing, Anxiety / Depression, Chronic Illness, Stress, Pain, The "blues", Sleeplessness, Mood Swings. Ingredients: Agrimony 30CH, Aspen 30CH, Beech 30CH, Cerato 30CH, Cherry Plum 30CH, Chestnut Bud 30CH, Chicory 30CH, Crab Apple 30CH, Elm 30CH, Gentian 30CH, Gorse 30CH, Heather 30CH, Holly 30CH, Honeysuckle 30CH, Hornbeam 30CH, Impatiens 30CH, Larch 30CH, Mimulus 30CH, Mustard 30CH, Oak 30CH, Olive 30CH, Pine 30CH, Red Chestnut 30CH, Rock Rose 30CH, Rock Water 30CH, Scleranthus 30CH, Star of Bethlehem 30CH, Sweet Chestnut 30CH, Vervain 30CH, Vine 30CH, Walnut 30CH, Water Violet 30CH, White Chestnut 30CH, Wild Oat 30CH, Wild Rose 30CH, Willow 30CH, ATP 5X, Pineal 6CH, Thymus 6CH, Reverse osmosis water 68%, Kosher glycerine from palm/or coconut oil 20%, Ethanol 12% (2 oz)

Homeopathic Remedies

- Adrenal Milieu (<http://petmedella.com/product/adrenalmilieu/>) - \$26.00
Traditionally Supports: Adrenal Drainage, Chronic Fatigue, Infection, Colds / Flu, Hormonal Imbalances, Photophobia. Ingredients: Adrenalin 3X, 6X, 12X, Aralia Quinquefolia 3X, 6X, 12X, Arsenicum Album 12X, Avena Sativa 3X, Eleutherococcus Senticosus 12X, Glycyrrhiza Glabra 1X, 3X, Kali Phosphoricum 12X, Natrum Muriaticum 12X, Nux Vomica 12X, Phosphoricum Acidum 12X, Pituitary 3X, 6X, 12X, Ribus Niger 1X, Rosa Canina 3X, 6X, Smilax Regellii 1X, Thyroid 3X, 6X, 12X, Veratrum Album 12X, Zinc 6X, ATP 6X, Bee Pollen 1X, Olive 30CH, Oak 30CH, Rock Water 30CH, Vervain 30CH, Sweet Chestnut 30CH, Reverse osmosis water 68%, Kosher glycerine from palm/or coconut oil 20%, Ethanol 12% (2 oz)

[Add to Cart](#)

- Lymph 2 (<http://petmedella.com/product/lymph2/>) - \$26.00

Notes

There is some work to do with certain toxins and fortifying some systems. The regimen to the left will work towards bringing things into balance. Based on size and stress levels:

- **Adrenal Milieu: 17 drops over food two times per day**
- **Lymph 2: 17 drops over food two times per day**
- **Ultimate Fields: 17 drops over food two times per day**
- **Berberine: 10 drops over food two times per day**

**Note: Most of PetMedella's herbal and homeopathic tinctures contain small amounts of ethanol. Ethanol helps extract more active ingredients from the remedies. Some pets have been known to not tolerate ethanol well. To remedy this potential issue, dilute the doses of herbal and homeopathic tinctures with an equal part of hot water and let set for 10 minutes before administering. This will evaporate the ethanol and leave only the medicinal components of the remedy.

It would be ideal to have your pet's hair and saliva samples scanned again to check your progress in roughly 4 to 6 weeks. Please call us directly at 612-812-9121 to schedule your phone consult to review your report with a practitioner.
