Notes

Most significantly stressed: Central & Peripheral Nervous System, Sinuses, Governing Vessel

We scan 58 points to create the system performance. There are a few systems in which your pet is currently experiencing stress as you can see from the chart above. In addition to the 3 most significantly stressed points listed above, the following points of the body are also driving some of your pet's systems down: **Joints, Ear Drainage, Teeth & Jaw Drainage**

Energetic Sensitivities

Your pet was scanned against close to 1000 different possible food and environmental sensitivities. Listed below are the items that came up sensitive. It would be good to limit exposure to the items that were found, for now. With time as the body rebalances, some of these sensitivities may subside.

Environmental:

- o Potpourri
- o Mold
- o Perfume Mix

Dairy Alternatives:

- o Soy Milk
- o Goat Milk

Fish:

Legumes:

- o Soy Bean

Meat:

Spices:

None

Sugars:

◦ Flower Blossoms	None	◦ Turkey	None
Additives:	Fruit:	◦ Pork	Vegetables:
None	None	◦ Goat	None
Ingredients:	Grains:	◦ Duck	
None	◦ Popcorn	◦ Chicken	
Dairy:	◦ Corn	Nuts:	
◦ Cheese Mix		None	
		Shellfish:	
		None	

Energetic Nutritional Imbalances

Your pet was scanned for enzyme, fatty acid, vitamin, mineral, and amino acid imbalances. Below are a list if those nutrients that were found.

Vitamin Imbalances:

- Vitamin B6
most food contains B6, but the highest amounts are in brewer's yeast, carrots, chicken, eggs, fish, meat, peas, spinach, sunflower seeds, walnuts, wheat germ, bananas, blackstrap molasses, broccoli, brown rice, cabbage, cantaloupe, dulse, plantains, potatoes, rice bran
- Pantothenic Acid (Vitamin B5)
beef, brewer's yeast, eggs, fresh vegetables, kidney, legumes, liver, mushrooms, nuts, royal jelly, saltwater fish, rye
- Inositol
sources include brewer's yeast, fruits, legumes, meats, milk, unrefined molasses, vegetables, whole grains

Enzymes:

- Protease
dietary sources include raw fruits and vegetables, sprouted seeds, raw nuts, whole grains, and legumes
- Bromelain
food sources include pineapple
- Potassium Bicarbonate
sources include almonds and bananas

Mineral Imbalances:

- Selenium
sources include meats, whole grains, brazil nuts, brewer's yeast, broccoli, brown rice, chicken, dairy products, dulse, kelp, liver, molasses, salmon, seafood, tuna, vegetables, wheat germ, cayenne, chamomile, fennel seed, parsley, peppermint
- Calcium
sources include milk, yogurt, hard cheese, cottage cheese, dark leafy green vegetables, strawberries, broccoli, citrus, dried peas, beans
- Boron
sources include walnuts, almonds, broccoli, honey, carrots, pears, bananas

Fatty Acids:

- CLA
sources of Conjugated Linoleic Acid (CLA) is grass fed beef and dairy products
- GLA
sources include flax, olive, and hemp oil
- Alpha-linolenic acid
sources include flax seed, walnuts, pecans, yogurt

Amino Acids:

- Carnitine
food sources include primarily meats and foods of animal origin
- Tyrosine
sources include chicken, turkey, peanuts, lima beans, almonds, avocados, bananas
- Glycine
sources include whitefish, spirulina, turkey, and gelatin

Energetic Toxins

Your pet was scanned against resonating heavy metals, bacteria, viruses, molds, parasites, and chemicals. Below are a list of those that were found, energetic in nature, which means your pet may just be carrying the energy of the toxin and should be cleared through the protocol. If you would like to discuss this in more detail please email us at info@petmedella.com (/contactus) or call 612-812-9121.

Bacteria:

None

Parasites:

- Parasites Resonate

Molds/Fungus/MycoToxins:

- Mycotoxins Resonate
- Molds/Fungi Resonates

Viruses:

- Viruses Resonate

Chemicals:

None

Heavy Metals:

None

Energetic Hormonal Imbalances

Your pet was scanned to find resonating hormonal imbalances and the hormones detected are listed below. These hormones will directly or indirectly be addressed through the protocol.

Hormones

- TSH
Secreted by the anterior lobe of the pituitary gland and stimulates the thyroid gland.
- DHEA
A natural steroid and precursor hormone produced by the adrenal glands.

Balancing Items

[Our Store \(/shop\)](#)

After analyzing stress levels, imbalances, and toxins, a custom regimen has been developed. This regimen has been tested against the hair and saliva samples you provided to ensure the most balancing program for your pet. It is important to understand that it may take a few months of following before you see the results you are looking for because this type of work is sustained health versus a quick fix. It is suggested you get your pet scanned every one to two months to see the biggest benefits.

Flower Essences

- Ultimate Fields (<http://petmedella.com/product/ultimatefields/>) - \$26.50
This Flower Essence Traditionally Supports: Emotional Issues, Energy Balancing, Anxiety / Depression, Chronic Illness, Stress, Pain, The "blues", Sleeplessness, Mood Swings. Notes

There is some work to do with certain toxins and fortifying some systems. The regimen to the left will work towards bringing things into balance. Based on size and stress levels:

- **Olive Leaf: 10 drops over food two times per day**
- **Drainage Milieu: 16 drops over food two times per day**
- **Ultimate Fields: 16 drops over food two times per day**
- **Para Tox: 16 drops over food two times per day**

**Note: Most of PetMedella's herbal and homeopathic tinctures contain small amounts of ethanol. Ethanol helps extract more active ingredients from the remedies. Some pets have been known to not tolerate ethanol well. To remedy this potential issue, dilute the doses of herbal and homeopathic tinctures with an equal part of hot water and let set for 10 minutes before administering. This will evaporate the ethanol and leave only the medicinal components of the remedy.

It would be ideal to have your pet's hair and saliva samples scanned again to check your progress in roughly 4 to 6 weeks. Please call us directly at 612-812-9121 to schedule your phone consult to review your report with a practitioner.
